

TRANSMISSION CHAINS

WE DELIVER THE POWER

Suited to a wide range of transmission applications and conditions.

ROLLER CHAINS

TAGEX IS AN ESTABLISHED
DISTRIBUTOR OF CHAINS
REQUIRED FOR THE FOLLOWING:

- MASSEY FERGUSON
- JOHN DEERE
- GERINGHOFF
- CLAAS AND MORE

Roller chains' precision engineering create robust links to endure the intense process of constant movement and force.

Available in a range of sizes, configurations and designs, roller chains exhibit high versatility which makes them easily adaptable for various machinery and applications with flexible solutions for diverse power transmission needs.

ROLLER CHAIN RANGE:

- British Standard Roller Chains
- American Standard Roller Chains
- Agri Chains

QUALITY LEVELS:

TAGEX PREMIUM:

Less wear | Seamless rollers & bushes | Square riveting

TAGEX STANDARD:

Manufactured on modern precision presses | Quality assurance

NSR ROLLER CHAINS:

A good quality, cost-effective alternative in the standard market segment.

INCLUDING:

- Combine Chains
- Baler Chains
- Corn Picker Chains
- Pintle Chains
- Gate Intake Chains
- Mill Chains - on request.

Stainless Steel Roller Chains on request

The reliability you need in a wide range of conveyor applications and conditions.

CONVEYOR CHAINS

A conveyor chain is commonly used in industries such as processing plants or logistics and production lines to transport large quantities of items.

Designed specifically for chain conveyor systems it consists of a series of journal bearings held together by constraining link plates. Each bearing consists of a pin and a bush on which the chain roller revolves. Each type of chain is available in a range of different pitches. The minimum pitch is dictated by the need for adequate wheel tooth strength and the maximum is determined by plate rigidity.

CONVEYOR CHAIN RANGE:

- Transmission Chains
- Agri Chains

QUALITY LEVELS:

TAGEX PREMIUM:

Less wear | Seamless rollers & bushes | Square riveting

INCLUDING:

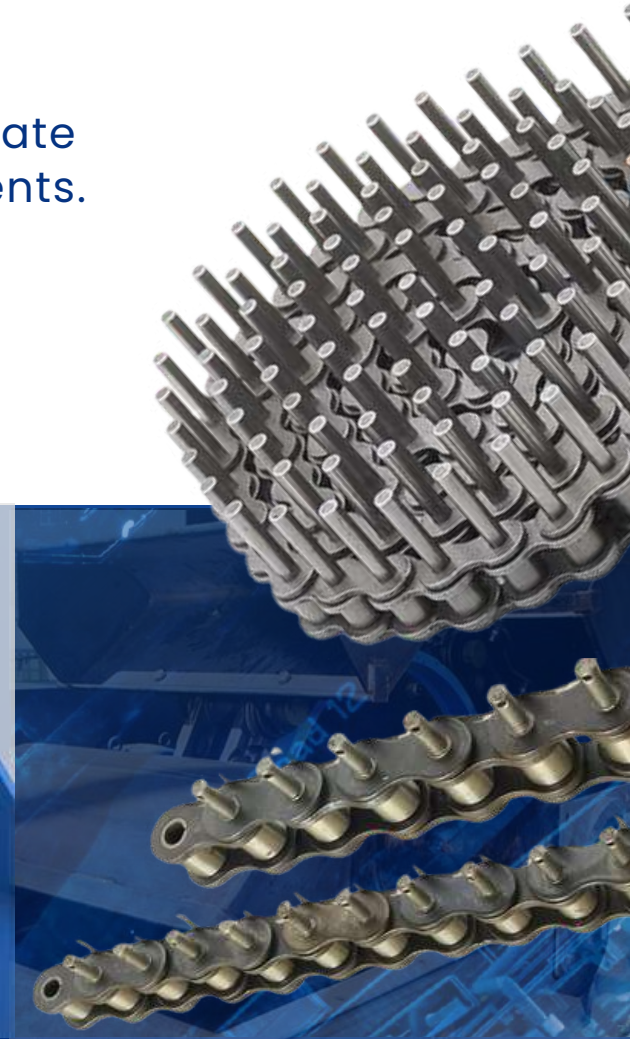

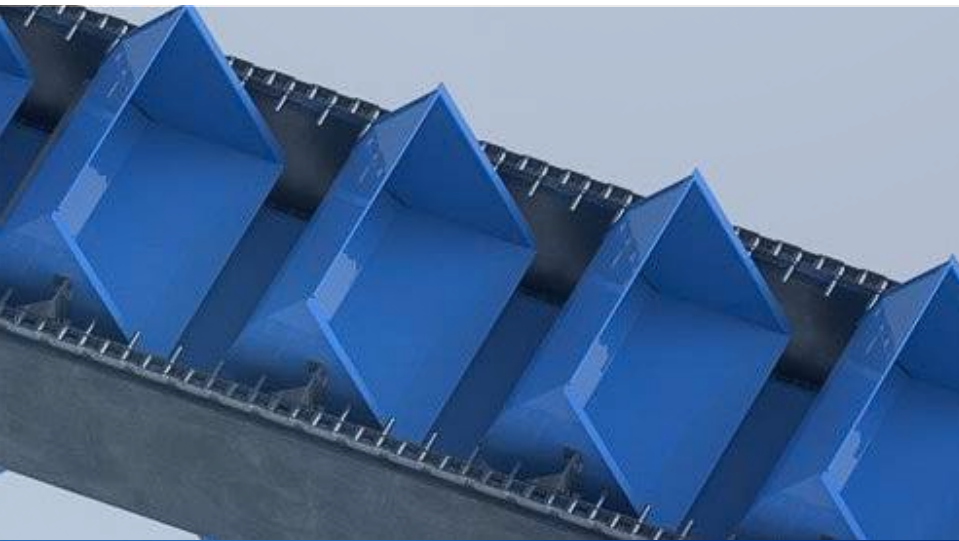

- Hollow Pin Conveyor Chains
- Solid Pin Conveyor Chains
- Mill Chains - on request.

Stainless Steel Chains on request

The reliability you need to accommodate a wide range of component attachments.

EXTENDED PIN CHAINS

Extended pin attachment chains are specifically engineered to accommodate a wide range of attachments and accessories used in conveyor and material handling systems.

These chains feature extended pins on their links, providing a secure and convenient method for attaching specialized components eg. buckets, cleats or other devices that carry, elevate or manipulate products during transport. They are used in various industries including agriculture, packaging, and bulk material handling.

EXTENDED PIN CHAIN RANGE:

- **Transmission Chains**
- **Agri Chains**

QUALITY LEVELS:

TAGEX PREMIUM:

Less wear | Seamless rollers & bushes | Square riveting

TAGEX STANDARD:

Manufactured on modern precision presses | Quality assurance

INCLUDING:

Stainless Steel Chains on request
